

MagnaDrive™ Extends Power Range for Air Cooled Drives.

WOODINVILLE, Washington, 06/4/2015 – MagnaDrive is pleased to announce a significant breakthrough with its Adjustable Speed Drive product line.

Continuing a focus with ongoing product improvement MagnaDrive has now increased the operating power range from 500HP to 600HP for the air cooled Adjustable Speed Drive.

“Extending the power range to 600HP, for our ASD line, helps to significantly expand the addressable market for this innovative technology,” commented Paul Humphreys, VP Sales and Marketing, adding “the cornerstone of the ASD product line is offering precise speed control in a simple robust package, so extending the range of loads supported by this solution provides our customers with more choices than were previously available.”

Relying on a history of engineering excellence, the development process to achieve a 20% power increase is leading to additional innovation throughout the entire ASD product family. Chief among them is to offer more power in smaller packages, thereby increasing the cost effectiveness of providing equipment protection, process control and energy savings.

About MagnaDrive Corporation

Founded in 1999, in Seattle Washington MagnaDrive’s groundbreaking magnetic torque-transfer couplings and speed drives provide highly effective means of protecting critical equipment and processes. Beyond the mechanical benefits of MagnaDrive’s technology, our couplings and drives have the ability to achieve significant energy savings. MagnaDrive serves multiple markets, around the world including power generation, mining, oil and gas, maritime, the U.S. Navy, water and wastewater, HVAC, and general manufacturing.
