

MagnaDrive Exhibits at EnerCon China 2014

WOODINVILLE, Washington, 11/18/14 – MagnaDrive will be exhibiting product at EnerCon China, November 27-29, 2014.

Located in Beijing and comprising over 200,000 sq. ft. EnerCon China represents one of the fastest growing international trade fairs dedicated exclusively to energy conservation and environmental protection. EnerCon provides a unique forum for both manufacturers and service providers dedicated to delivering energy conscious solutions for the Asian industrial marketplace.

“We’re excited to have this unique opportunity to present MagnaDrive’s extensive range of energy conservation products” said Paul Humphreys, VP Sales & Marketing, “we’ll be exhibiting the latest innovations in our drive and coupling product lines, all geared toward reducing energy consumption for our industrial customer base.”

MagnaDrive products work well within the unique power generation and transmission characteristics presented by the Asian marketplace. Humphreys added, “Our ability to offer highly cost-effective industrial process control, together with minimizing harmful vibrations, is positioning MagnaDrive to become a preferred choice for industrial coupling and drive solutions.”

About MagnaDrive Corporation

Founded in 1999, in Seattle Washington MagnaDrive’s groundbreaking magnetic torque-transfer couplings and drive technology provide highly effective means of protecting and controlling critical equipment and processes for a range of industrial and commercial applications. Beyond the mechanical benefits of MagnaDrive’s technology, it also has the ability to achieve significant energy savings. MagnaDrive serves many markets, around the world including power generation, mining, oil and gas, maritime, the U.S. Navy, water and wastewater, HVAC, and general manufacturing.
